

REMARKS

Claims 23-26 are presented for consideration, with Claims 23-26 being independent.

The independent claims have been amended to better set forth Applicants' claimed invention.

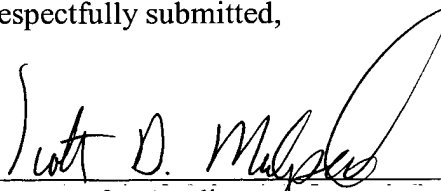

Claims 23-26 stand rejected on obviousness double patenting grounds as being unpatentable over Claims 1-4 of U.S. Patent No. 6,668,437. In the claims of the '437 patent, a second layer of electrode material is formed at a peripheral area by screen printing.

As will be appreciated, Claims 23-26 have been amended to now set forth that a second layer of electrode material is formed at a peripheral area without reference to how it is formed. It is respectfully submitted that these claims are patentably distinct from the Claims 1-4 of U.S. Patent No. 6,668,437.

In view of the foregoing, reconsideration and allowance of this application is deemed to be in order and such action is respectfully requested.

Applicants' undersigned attorney may be reached in our Washington, D.C. office by telephone at (202) 530-1010. All correspondence should continue to be directed to our below-listed address.

Respectfully submitted,

Attorney for Applicants
